

APPENDIX 4 - BHP PUBLIC ENGAGEMENT

Engagement activities were carried out with the provincial, municipal and federal governments as well as First Nations and Metis.

The following public open houses have been held and questionnaires were distributed to collect feedback:

Action	Timing	Attendance/Notes
Information Sessions – 1	<p>Nokomis - December 13, 2017</p> <p>Jansen – December 14, 2017</p>	<p>60 people attended the Nokomis Community Hall session and 50 people attending the Jansen Community Hall session. BHP representatives attended and were available to share potential routes, provide additional information, answer questions and record attendee (resident and landowner) concerns/comments.</p> <p>Advertising was completed by direct email invitations to local and Indigenous leadership which included posters for the communities to share, 1,400 targeted mail drops, and advertising in the local newspapers. Individual landowner invitations were mailed for each open house.</p> <p>The vast majority of the feedback in Session 1 was related to alignment, while some indicated their preference was for no rail line at all. Public concerns received about the CN Line have primarily been related to public safety and maintenance.</p>
Information Sessions – 2	<p>Jansen – March 6, 2018</p> <p>Nokomis – March 7, 2018</p>	<p>47 people attended the Nokomis Community Hall session and 66 people attending the Jansen Community Hall session. The second set of sessions were held to share the revised route, respond to feedback received and seek additional feedback.</p> <p>Advertising and engagement outreach followed the same pattern as in Session 1. Comments and feedback were similar to what is noted above.</p>

BHP distributed newsletters to 12,000 local residents.
